Weave your portrait by hand.

Four choices become a thread pattern, a portrait card and a material preview.

01 WIND A PATH

AI-ASSISTED APPARATUS ILLUSTRATION / 1 START + 8 POSTS

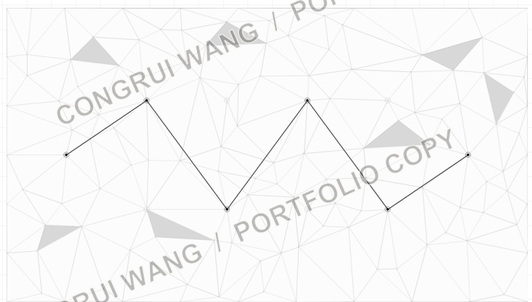

ON-SITE WINDING

FOUR DECISIONS / ONE VISIBLE PATH

A thread emerges from one starting hole. Visitors make four decisions, choosing one post in each column of a two-row, four-column array: eight copper posts in total.

02 FIND A PORTRAIT

ORIGINAL CARD 13 / ONE OF 16 PATTERN FRONTS

ON-SITE CARD READING

A POEM + VISUAL SUGGESTIONS

I designed sixteen double-sided cards. Each front matches a thread pattern; the reverse pairs a character poem with recommended visual effects.

03 LAYER A PREVIEW

AI-ASSISTED MATERIAL ILLUSTRATION / TWO REGISTRATION AXES

ON-SITE LAYERING

TWO POSTS / REPLACEABLE EFFECTS

Transparent effect cards fit over two copper posts at opposite corners of a fixed Federer photograph. Visitors stack and replace layers to preview different visual combinations.

- Four choices
- Thread path
- Portrait card
- Transparent layers
- Visual preview

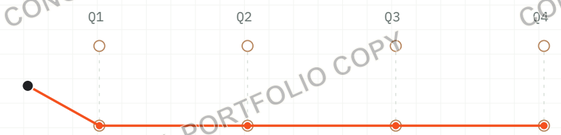

- Preferences become actions, paths and images that people can understand through making.

A portrait you can hold.

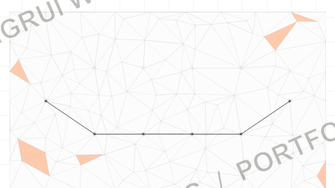

The fixed image stays; the expressive treatment is something visitors can compare and change.

01 GIVE A PREFERENCE A SHAPE

I translated the choice system into a tangible sequence: choose four times, wind a path, find a card, then try its suggested effects.

1 START / EIGHT COPPER POSTS / 2 ROWS x 4 COLUMNS

ORIGINAL CARD 01

16 DOUBLE-SIDED CARDS

She does not shine through someone else's template; she makes the whole movement her own.

Card 01 / English excerpt.
Reverse: a character poem and recommended visual effects.

AI-ASSISTED EXPLANATORY ILLUSTRATION

PHYSICAL PREVIEW / TWO ALIGNED HOLES

Transparent effect cards fit over two copper posts at opposite corners of a fixed Federer photograph. Visitors stack and replace layers to preview different visual combinations.

MATERIAL LOGIC

Two posts hold the image and transparent cards at opposite corners. Stack, remove or replace a layer; see the change immediately.

- Preferences become actions, paths and images that people can understand through making.

One thread. Your interpretation.

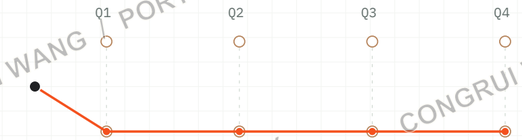

A participatory exhibition turns preferences into gestures, patterns and visual possibilities.

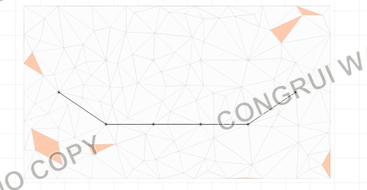

ACTUAL EXHIBITION / WINDING A PERSONAL PATH

A visitor makes four decisions by winding a thread around one post in each column. The resulting pattern is a small, physical expression of their preferences.

01 FOUR CHOICES, EIGHT POSTS

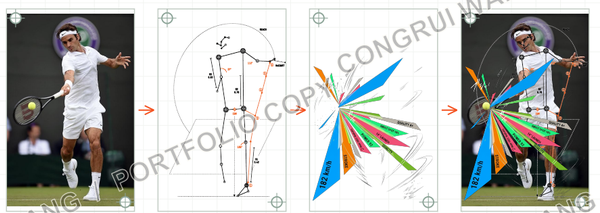

ONE START HOLE / TWO ROWS x FOUR COLUMNS

ORIGINAL CARD 01

16 matching fronts.
A poem and effect suggestions on each reverse.

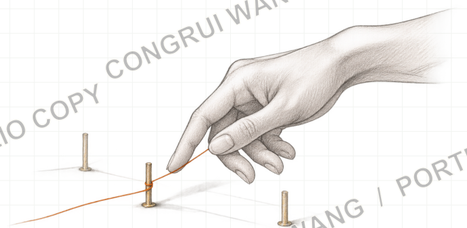

02 BUILD A VISUAL PREVIEW

BASE POSE IMPACT PREVIEW

ORIGINAL PRINTED BASE + EFFECT CARDS

Visitors place transparent cards over two posts at opposite corners of the Federer image. Replacing a layer changes the visual treatment.

AI-ASSISTED PENCIL GESTURE STUDY

CARD 01 / ENGLISH EXCERPT

She does not shine through someone else's template; she makes the whole movement her own.

- Four choices
- Thread path
- Portrait card
- Transparent layers
- Visual preview

- Preferences become actions, paths and images that people can understand through making.
